

***Research Project for Removable
Prosthodontic Department***

***Dr / Nourhan Ahmed Ragheb
Lecturer of Prosthodontics
Faculty of Dentistry
Kafr El Sheikh University***

Fourth year 2019/ 2020

Research Topics

- 1. Recent advances in impression techniques for rehabilitation of resorbed alveolar ridge (flat ridge) with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied.***
- 2. Recent types of denture base materials for complete denture with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied.***
- 3. Recent techniques of occlusal adjustment of complete denture with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied***
- 4. Recent advances of secondary impression techniques for complete denture with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied***
- 5. Recent advances of jaw relation techniques for complete denture with illustration in brief the management techniques for different situations of advanced removable design prosthodontic cases you studied***
- 6. Micro surface design of dental implant from old to new with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied***
- 7. Macro surface design of dental implant from old to new with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied***

- 8. Implant supported over denture for rehabilitation of completely edentulous patients from old to new with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied***
- 9. Different techniques of occlusal adjustment in single denture from old to new with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied***
- 10. Management of mandibular single denture from old to new with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied***
- 11. Different theories for time of implant installation from old to new, with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied***
- 12. Immediate loading protocol for implant supported prosthesis from old to new , with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied***
- 13. Delayed loading protocol for implant supported prosthesis from old to new , with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied***
- 14. Management of different complete denture problems from old to new with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied***
- 15. Different techniques of complete denture relining and rebasing from old to new with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied***
- 16. Hybrid prosthesis for rehabilitation of completely edentulous***

patients with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied

17. Balanced occlusion theories for complete denture from old to new with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied

18. Recent advances of thermoplastic acrylic resin for construction of complete denture with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied.

19. Recent advances in management of cases with combination syndrome with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied.

20. Different types of computer guided stent used for implant placement from old to new with illustration in brief the management techniques for different situations of advanced removable prosthodontic cases you studied.

Good Luck
