

***Research Project for Removable
Prosthodontic Department***

***Dr / Nourhan Ahmed Ragheb
Lecturer of Prosthodontics
Faculty of Dentistry
Kafr El Sheikh University***

Third year 2019/ 2020

Research Topics

- 1. The recent advances in denture base materials for removable partial denture with briefing the types and indications of each component of metallic removable partial denture and surveying procedures***
- 2. The recent types of esthetic clasps used with removable partial denture with briefing the types and indications of each component of metallic removable partial denture and surveying procedure***
- 3. The recent advances in types of dental surveyor with briefing the types and indications of each component of metallic removable partial denture and surveying procedures***
- 4. Stress breaking components of metallic removable partial denture with briefing the types and indications of each component of metallic removable partial denture and surveying procedures***
- 5. Different types of rests used with removable partial denture from old to new with briefing the types and indications of each component of metallic removable partial denture and surveying procedures***
- 6. Different types of maxillary major connector in removable partial denture from old to new with briefing the types and indications of each component of metallic removable partial denture and surveying procedures***
- 7. Different types of mandibular major connector in removable partial denture from old to new with briefing the types and indications of each component of metallic removable partial denture and surveying procedures***
- 8. Recent advances in techniques of construction of removable partial denture with briefing the types and indications of each component of metallic removable partial denture and surveying procedures***

9. ***Recent advances of thermoplastic acrylic resin for construction of removable partial denture with briefing the types and indications of each component of metallic removable partial denture and surveying procedures***
10. ***Recent advances in different types of face bow with briefing the types and indications of each component of metallic removable partial denture and surveying procedures***
11. ***Recent advances in different types of attachments used with metallic removable partial denture with briefing the types and indications of each component of metallic removable partial denture and surveying procedures***
12. ***Recent advances in different types of attachments used with metallic removable partial denture with briefing the types and indications of each component of metallic removable partial denture and surveying procedures***
13. ***Recent advances in different types of artificial teeth used with partial and complete denture with briefing the types and indications of each component of metallic removable partial denture and surveying procedures***
14. ***Recent advances in different types of acrylic removable partial denture with briefing the types and indications of each component of metallic removable partial denture and surveying procedures***
15. ***Different techniques of complete denture repair from old to new with briefing the types and indications of each component of metallic removable partial denture and surveying procedures***
16. ***Recent advances in impression trays for completely and partially edentulous patients with briefing the types and indications of each component of metallic removable partial denture and surveying procedures***

Good Luck
