

List of Equipments in Biochemistry Department

Instrument	Number	Function	Image
1. UV-Visible-Spectrophotometer	2	Measurement of the Absorbance to calculate the concentration	
2. Microscope	1	Magnifying objects	
3. Distillator	1	Obtaining distilled water	
4. Analytical balance (4 digits)	1	Accurate weighing of very fine powders	

5. Water Bath	1	Heating	
6. ELISA	1	Measuring the optical density for calculating the concentration	
7. Refrigerator	1	Cooling samples
