

تحية طيبة وبعد

نتشرف بان نحيط سيادتكم علما بمقترحات مواضيع الابحاث الخاصة بتقييمات الطلبة لمقرر الكيمياء الحيوية (1) للفرقة الثانية بكلية الصيدلة جامعة كفر الشيخ ، للعام الدراسي ٢٠١٩ / ٢٠٢٠ (لائحة ٢٠١٦) وهي كالاتي:

	TOPICS
1	Glycoproteins (Structure, Functions & Application of Synthetic Glycoproteins)
2	Stereoisomerism (Definition, Types, Examples & Biomedical application)
3	Monosaccharide ((Definition, Classifications with Examples, functions in addition to its nutritional value with focusing on Health effects of dietary carbohydrate restriction
4	Triacylglycerol (Structure, Synthesis in human, Storage with reference to different types of Adipose tissues & Fatty Liver pathogenesis)
5	Phospholipids (Structure, types, Functions, & phospholipids deficiency related diseases)
6	Glycosides (Definition, Classifications with Examples, functions in addition to its nutritional value with focusing on different Disaccharides
7	Cholesterol (Structure, Functions, distribution, Transport by different Lipoproteins & its involvement in Atherosclerosis Pathogenesis)
8	Inborn Errors Of metabolism of different types of carbohydrates
9	Glycogen structure, function and metabolism with discussing different types of glycogen storage diseases in details.
10	Enzymes (Definition, IUB Classification and Biomedical importance with highlight on different diseases occurs due to genetic abnormalities of enzymes

ولسيادتكم جزيل الشكر

وتفضلوا بقبول فائق الاحترام

مقدمه لسيادتكم

د. رويدا رأفت ابراهيم

مدرس الكيمياء الحيوية الطبية
