

الاستفسار الاكلينيكي في العظام

Code: 130507

السيد الأستاذ الدكتور: رئيس كنفترول الفرقة الرابعة للفصل الدراسي الثاني للعام الجامعي ٢٠٢٠/٢٠١٩
بكلية العلاج الطبيعي، جامعة كفر الشيخ

تحية طيبة وبعد ،،،،

أتقدم لسيادتكم بأسماء موضوعات الأبحاث المرجعية المطلوبة من الطلاب لعمل بحث فيها لمادة العلاج الطبيعي للعظام ٢ (الطرفين السفليين) وهي كالتالي:

1. Give a prospective understanding of pain in order to treat patients emphasizing the influence of stress, coping and social factors on pain and disability in musculoskeletal practice.
2. Assessment, reasoning and management of psychological factors in musculoskeletal practice.
3. Clinical prediction rules: their benefits and limitations in clinical reasoning.
4. Clinical reasoning in action: Case studies: *examples*
 - A multifaceted presentation of knee pain in a 40-year-old woman.
 - Lateral elbow pain with cervical and nerve-related components.
5. Nonspecific low back pain: manipulation as the approach to management.
6. Applying contemporary pain neuroscience for a patient with maladaptive central sensitization pain.
7. Thoracic spine pain in a soccer player: A combined movement theory approach.
8. Incorporating biomechanical data in the analysis of a University student with shoulder pain and scapula dyskinesis.
9. Acute exacerbation of chronic low back pain with right-leg.
10. Physical therapy chosen over lumbar micro-discectomy: A functional movement systems approach.
11. Learning and facilitating clinical reasoning. What are the strategies to facilitate clinical reasoning development.
12. Physical Therapy Based on clinical reasoning for knee osteoarthritis patients.
13. Clinical reasoning for exercises in subacromial pain syndrome.
14. Clinical reasoning and advanced practice privileges in rehabilitation after knee arthroplasty.
15. The role of computer simulation in the development of clinical reasoning skills.

وتفضلوا بقبول فائق الاحترام
