

Date: 2019/ 2020
Plant pathology
3rd degree

Kafrelsheikh University
Faculty of sciences
Botany & Microbiology Department

Research on one of the following:

1. Methods of the pathogen penetrations.
2. Structural defenses of plant to the pathogens.
3. Damping-off disease of seedling caused by *Pythium*.
4. Stages of plant disease.
5. How pathogens attack plants.
6. Chemical defenses of plant to the pathogens.
7. Late blight disease of potatoes.
8. Induced defenses of plant to the pathogens.
9. Powdery mildew of roses.
10. Early blight disease of tomatoes by *Alternaria*.
