

أكتب بحثا كاملا - بالمراجع - في موضوع واحد مما يلي مستعينا بأكثر من مصدر:

- 1- Four different types of adsorbents as stationary phase in planar chromatography.
- 2- Chemical and physical methods for identification of non-colored spots in planar chromatography.
- 3- Precautions should be considered before applying TLC experiment.
- 4- Mechanisms for separation in chromatographic techniques (adsorption – partition – ion exchange – exclusion).
- 5- Classification of adsorption chromatography (planar and column).
