

Kafrelsheikh University

Faculty of Veterinary of Medicine

Pathology Department

Title of student research projects of 4th degree student, Specific pathology, 2nd term.

1- Comparative pathological study of cattle plague, BVD and MD and MCF

- pathogenesis and morphology of lesions.

2 – Study of herpes virus disease in domestic animals.

- name of diseases, mode of infection and morphology of lesions.

3- Study of species difference in Pox diseases

- Cattle, sheep, pathogenesis, distribution of lesions and morphology of lesions.

4- Pathogenesis and tissue reaction in canine viral encephalitis

- name of diseases, pathogenesis, forms and morphology of lesions.

5- Study of pathogenesis, morphology of disease caused by Corynebacterium ovis in domestic animals

- host, pathogenesis and morphology of lesions.

6- Study of pathogenesis and tissue reaction in some granulomatous disease in cattle

- name of diseases, pathogenesis and distribution and morphology of lesions.

7- - Study of pathogenesis and morphology of lesions caused by anaerobic bacteria

- Name of diseases, hosts and morphology of lesions.

8- Study of some enterogenic diseases in cattle

- Name of disease, hosts, pathogenesis and morphology of lesions.

9- Study of diseases causing abortion in cattle.

- etiology, pathogenesis and morphology of lesions.

10_ Study of animal and poultry mycosis

- Host, cause and morphology of lesions.

Under supervision of

Prof Dr Abdel-Rahman Khater

Dr nagwan Mahmoud Elhabashi

Dr Samah Salem Aboasa
